Software/Tools: Unity, Github, Autodesk Inventor, Solidworks, Google Workspace, Adobe Illustrator

Teaching Assistant, *University of Minnesota*, Minneapolis, MN

January 2023 - Present

- Assisting Evan Suma Rosenberg for their class “Programming Interactive Computer Graphics & Games.”
- Hosts office hours multiple times a week in which students can ask questions and receive help on homework assignments.
- Answers homework questions on the class forum.

D&D in Virtual Reality, *Project*

November 2022 - December 2022

- Used Unity to create a base for a large-scale Dungeons and Dragons interactive game.
- Implemented working UI menus to allow the player to change maps and quit the program using a laser pointer attached to the player’s right hand.
- Added a set of basketball-size dice objects to toss around the scene with realistic physics.
- Attached a teleportation system to the player’s left hand, allowing quicker navigation of the scene.

Raytracer, *Project*

January 2022 - February 2022

- Wrote 500+ lines of code from scratch in C++ to create a simple raytracer program.
- The program reads a scene description in from a file and uses ray casting to determine the appropriate color to store in each pixel of the output image.
- The rendered output image is a file in ASCII PPM format.
